

DESCRIPTION

Paver Lacquer Polish is an acrylic polymer coating for glossy hard finish for cement tiles & paver blocks. It is having minimum 20% extra gloss than ordinary coatings and at the same time because of its fine nature, it gives coverage of at least 30-40% extra over ordinary lacquers.

ADVANTAGES

- Very hard films over surface
- It gives high glossy finish and shine with good scratch resistance
- Excellent abrasion resistance
- Appreciable water on alkali resistance
- Exceptionally high coverage area
- It gives good transparent coating
- It is used on designer tiles, tile, decorative stones, paver tiles.
- Water resistance and strong bonding
- Protection of sun light.

USAGES

- Clean and dry the surface of concrete tiles
- Apply lacquer coating on concrete tiles by spry air compressor gun machine.
- Cover clear lacquer coating approximately 100-110 sq. ft. in 1 ltr.
- It is applying on Cement Concrete Block, Paver block, Reflective interlocking glossy block, Man-galore Tiles It is high Glossy and good shiner for paver block, Nail proof quality

PROPERTIES

Physical Apperance	: Clear Liquid
Specific Gravity	: 0.950 + 0.005
Packing	: 50, 100 and 210 ltr. Iron Drum.

STORAGE AND SHELF LIFE

PAVER HARDENER should be stored in sealed containers between 5°C and 40°C and protected from frost. Under these conditions the shelf life is 1 year minimum

QUALITY ASSURANCE

AMBICA SPECIALITY CHEMICALS is a firm of Assessed Capability. The company's quality system conforms to ISO 9001:2015.

HEALTH & SAFETY

Paver Lacquer Polish is no-toxic and non-flammable. Avoid inhalation of dust during mixing and wear safety glasses, dust mask and gloves. If skin contact occurs wash thoroughly with clean water. Should eye contact occur rinse immediately with plenty of clean water and seek medical advice. Full health and safety data are given in Product Safety Data Sheet.
